STANDARD WORKING FOR INITIAL STEPS EARTH FROM THE FOREST CONSERVATION LAW

SEQUENCE OF CONSTRUCTION ON SITES CONTROLLED BY THE FOREST CONSERVATION LAW

- Prior to clearing of trees, installing sediment control measures or grading, a preconstruction meeting must be conducted on site with the Montgomery County Department of Permitting Services (MDCPS) sediment control inspector (210) 777-4210 (48 hours notice), the Owners representative, and the site Engineer.
- The limits of disturbance must be field marked prior to clearing of trees, installation of sediment control measures, construction, or other earth disturbing activities.
- Clear and grade for installation of sediment control devices.
- Install sediment control devices. Traps and berms shall be constructed prior to construction of any earth dikes that convey drainage to a Trap and/or Berm.
- Once the sediment control devices are installed, the permittor will obtain written approval from the MDCPS inspector before proceeding with any additional clearing, grubbing, or grading.

NOTE 1: All requests should call for the permittor to obtain written approval from MDCPS inspector prior to the removal of any sediment control device.

NOTE 2: Any site that has a proposed storm drain diversion project should have its Sequence of Construction state the following:

- The construction of the diversion in the storm drain construction step and once the drainage area is stabilized, the storm drain system must be flushed any time the piping connects and the construction of unflushed drain pipe.
- Once the drainage area is stabilized, the storm drain system must be flushed any time the piping connects and the construction of unflushed drain pipe.
